DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase “pressure oil” used in several of the claims is indefinite. The phrase “pressurized oil” is a proper combination to describe oil that has been pressurized. Here is another suggestion that would clarify the claim language: “...when the oil is pressurized by a force acting upon the die cushion pad, the sealed gas is compressed only by the pressurized oil.” Appropriate action is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Treer (US Patent 2,007,290). Treer discloses a die cushion apparatus of a press machine having a die cushion pad (30); a first pressure receiving unit for containing pressure oil (35); and a second pressure receiving unit for containing sealed gas (See Figure 2 and 5, between cap 15a and piston 33), wherein the die cushion pad and the first and second pressure receiving units are structured

Art Unit: 3725

and arranged such that when the oil is pressurized by a force (plunger 9) acting upon the die cushion pad, the sealed gas is compressed only by the pressurized oil (Column 3, lines 65-75, Column 4, lines 1-9, "This downward movement of the piston 24, will be transmitted through the fluid to the plunger 33 and piston 32 and cause them to move downwardly against the air pressure in the cylinder 15." Also see Figure 2 and 5). Regarding claim 6, Treer discloses an apparatus capable of performing the claimed method step.

Allowable Subject Matter

3. Claims 2-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

4. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and further show the state of the art. US Patent 3,147,722

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3725

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
